

Engineered for Retail Applications

Watch registers, monitor customer areas and protect your business from liability incidents with a secure off-premise solution.

Ideal for: Retail Stores • Convenience Stores • Restaurants • Salons

Benefits for Retail Applications

- **PCI Compliance** Video streaming requires no inbound firewall ports—preserving network integrity, protecting customer data, and maintaining compliance with PCI regulations.
- **Enhanced Security** Video is fully encrypted during streaming and while stored in the cloud, and off-prem storage eliminates risk of operational failure or tampering/theft of the local recording device.
- **Evidence Retention** Flexible storage options allow for weeks, months, or years of video retention – meeting statute of limitations for slip/fall, workers comp, and other requirements
- **Multi-site Management** Centralized management of unlimited users, across single or multi-site installations, is ideal for operations with centralized LP or security functions.

Powerful and Secure

- Leverage unlimited computing power, bandwidth, and storage—as needed.
- All video stored in T4 data centers—featuring end-to-end data encryption and 3x data redundancy.
- Continuous security patches and automatically applied firmware updates keep customer data ultra-secure.

Lower Cost of Ownership

Alibi Cloud VS reduces the up-front investment in a local recording and/or storage device, and eliminates the installation and ongoing maintenance expenses required by an on-premise security solution.
