

VIDEO CONTENT ANALYTICS

Face Detection

The Face Detection feature enables you to identify when faces appear within the camera field of view. The camera can be set to sound an alarm, send an email, or send a notification whenever a face appears in the surveillance area.

Face Detection is ideal for these uses and more:

- Monitoring when visitors enter a building or facility
- Monitoring who accesses secure areas within a facility
- Monitoring who enters a school campus
- Validating identity at ATMs
- Capturing images of perpetrators of robbery, vandalism and other crimes, to assist law enforcement in identifying them

Applications

- ↘ Airports
- ↘ Banks
- ↘ Childcare Facilities
- ↘ Correctional Facilities
- ↘ Military Bases
- ↘ Office Parks
- ↘ Power Plants
- ↘ Schools
- ↘ Transit Stations
- ↘ Warehouses
- ↘ ...and more

Features & Benefits:*

- Easily configure Face Detection to:
 - Set up a schedule for when the camera monitors for Face Detection
 - Identify when faces are detected in the live view image
- Adjustable camera sensitivity allows you to set how frequently facial recognition is reported (sensitivity range: 1 to 5), to prevent false alarms and/or event triggers
- The VCA Search feature saves time by allowing you to quickly find, review and download video of Face Detection events
- The Video Playback feature allows you to easily review and analyze Face Detection events
- Customized triggered event recording reduces hard drive storage requirements

**Alibi DVRs, NVRs and IP cameras can perform Face Detection analysis*
