Object Removal Detection

IP

The Object Removal Detection feature enables you to draw a virtual quadrant anywhere within the camera field of view. The camera monitors this detection zone and can be set to sound an alarm, start recording or send a notification whenever an object is removed from the zone.

Object Removal Detection is ideal for:

- Determining which products customers touch and purchase, to improve store merchandising
- Preventing shoplifting and shrink due to employee theft
- Preventing theft in medical, laboratory and warehouse facilities
- Preventing vehicle theft from dealerships and parking lots
- Preventing theft of materials from construction sites

Applications

- ↘ Banks
- ↘ Convenience Stores
- ↘ Jewelry Stores
- ↘ Liquor Stores
- ↘ Logistics Centers
- ↘ Medical Facilities
- ↘ Museums and Galleries
- ↘ Pharmacies
- ↘ Retail Stores
- ↘ Vehicle Dealerships
- ↘ ...and more

Features & Benefits:*

- Easily configure Object Removal Detection to identify objects that meet certain requirements:
 - Are smaller than a maximum size, and larger than a minimum size
 - Are removed from the detection zone longer than a minimum time
- Adjustable camera sensitivity allows you to set maximum and minimum size of objects to be detected leaving the area, to prevent false alarms and/or event triggers
- The Arming Schedule allows you to set up a schedule for when the camera senses an object being removed
- The VCA Search feature saves time by allowing you to quickly find, review and download video of Object Removal Detection events
- The Video Playback feature allows you to easily review and analyze Object Removal Detection events
- Customized triggered event recording reduces hard drive storage requirements

**Alibi DVRs, NVRs and IP cameras can perform Object Removal Detection analysis*
