

Powerful Video Analytics

Want more from your security solution?

Get more from your video security systems with these powerful video analytics - included with all Alibi cameras and recorders*. They can help you save disk space, send intelligent alerts, provide email notifications and more.

*Certain analytics only available in select products. Call for details.

Set up real-time alerts & notifications

Tamper Detection

Sends an alert if the viewing angle changes, or has been blocked

Defocus Detection

Notifies of loss of image sharpness as a result of defocusing or dirtying of the camera lens

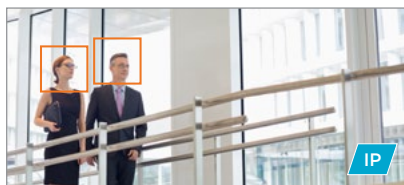

Audio Exception Detection

Detects sudden changes in sound intensity

Intrusion Detection

Object recognition in a defined zone. Set criteria based on object size and time duration.

Face Detection

Detects and provides snapshots of faces to aid in identification

Unattended Baggage

Detects suspicious objects and unattended baggage

Line Crossing

Provides alerts when objects cross a virtual fence (choose single or bi-directional)

Scene Change Detection

Detects changes to the reference frame, such as if the camera angle changes

Region Entrance/Exiting

Detects when an object enters or exits a predefined zone

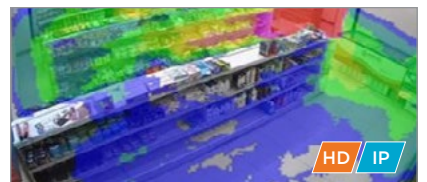

Object Removed

Detects objects that are left or removed from a scene

Object Counting

Provides directional counting information across a defined line

Heat Mapping

See a visual representation of people traffic in an area
